Mower models

By **TOM J. BECHMAN**

WHEN there are big cutting and mowing jobs to do, you need a mower suited to the job. Companies making these products introduced new models recently.

Be sure to take a look at them if you're in the market for a mower or rotary cutter. Here are some our editors discovered at farm shows.

Turbo line makes mowing easier

ADJUSTING mowing height on finishing mowers can be frustrating, but Rhino has solved that problem with the new heavy-duty Turbo series mowers. No tools are required to change cutting height; there is only a pin and one adjustment bushing at each location. A floating, compatible three-point hitch makes it easy to attach to the tractor. A standard 6-inch deep deck allows more room for material to be raised. Blade tip speeds in excess of 18,000 feet per minute ensure a clean and smooth cut. List price for the TM72 is \$2,995. Contact Rhino, Gibson City, Ill.; 877-408-3297; www.servis-rhino.com.

Rotary cutter deals with tougher jobs

WHEN it comes to rotary cutters, you want one that's going to stand up to the toughest job on the farm. Bush Hog's new 320 series heavy-duty rotary cutter line features 7-gauge-thick steel decks reinforced with internal 7-gauge steel strongbacks running the full length of the deck, tying together the entire structure with the gearbox stand. Gearboxes rate at 190 horsepower, and rugged ASAE Cat 5 drivelines are standard. Cutting widths of 5, 6 and 7 feet are available. The unit cuts up to 3½-inch-thick material. Contact Bush Hog, Selma, Ala.; 334-874-2700; www.bushhog.com.

Bush Hog introduces 2715 Legend flex wing cutter

DISTRIBUTION baffles keep debris in three equal cutting circles on the Bush Hog 2715 Legend flex wing cutter to prevent windrowing. Baffles are constructed of 7-gauge steel and attached with bolts for easy removal. Wing skids are also 7-gauge steel mounted on the outside of wings and turned up at a 45-degree angle to prevent dig in on turns. A high blade tip speed (16,000 feet per minute) means cleaner cutting. Contact Bush Hog, Selma, Ala.; 334-874-2700; www.bushhog.com.

ROTO-MIX

Rotary Mixing Has Proven Itself

More and more dairy operations are depending on our quality of construction and mixed ration. Our Vertical Xpress feed mixers offer more features and benefits and sizes to match your operation needs.

Available in 325 to 865 cu. ft. sizes.
Additional Truck Sizes also available.
VXT-865 shown.

- Low profile
- Quick mixing, twin screw design to handle round bales
- Large door opening for fast discharge of material
- Convenient PTO holder and hose storage
- Low maintenance with chain and sprocket drive with one right angle gearbox
- Fast processing of hay
- Convenient right hand discharge

Twin screws for faster mixing and processing of long fiber material.

Model 802
Truck shown.

Available in truck or trailer in sizes ranging from 362 to 802 cu. ft. capacity. All units feature high-speed vertical beaters, patent pending belt and retention gate, and a heavy-duty polyethylene chamber to prevent rust.
